

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims

Claim 1 (Cancelled).

Claim 2 (Currently Amended): ~~The~~ An image recording apparatus according to claim 1, comprising:

a signal processing unit for processing an image signal;

a recording unit for recording data by heating a recording medium;

a display unit for displaying the image signal; and

a main housing comprising a first housing and a second housing, which are different from each other,

wherein said display unit and said signal processing unit are disposed in said first housing and said recording unit is disposed in said second housing so that heat generated by said signal processing unit when said recording unit records the data is prevented from being conveyed directly to said recording unit.

Claim 3 (Currently Amended): ~~The~~ An image recording apparatus according to claim 1, comprising:

a signal processing unit for processing an image signal;

a recording unit for recording data by heating a recording medium;
a display unit for displaying the image signal; and
a main housing comprising a first housing and a second housing, which are different
from each other,

wherein said display unit and said recording unit are disposed in said first housing and
said signal processing unit is disposed in said second housing so that heat generated by said
signal processing unit when said recording unit records the data is prevented from being
conveyed directly to said recording unit.

Claim 4 (Cancelled).

Claim 5 (Currently Amended): The An image pickup apparatus according to claim 4,
comprising:

a camera unit for picking up an image of an object;
a signal processing unit for processing an image signal output from said camera unit;
a recording unit for recording data by heating a recording medium;
a display unit for displaying the image signal;
a main housing comprising a first housing and a second housing, which are different
from each other;

wherein said display unit and said signal processing unit are disposed in said first
housing and said camera unit and said recording unit are disposed in said second housing so

that heat generated by said signal processing unit when said recording unit records the data is prevented from being conveyed directly to said recording unit.

Claim 6 (Currently Amended): The An image pickup apparatus according to claim 4, comprising:

a camera unit for picking up an image of an object;

a signal processing unit for processing an image signal output from said camera unit;

a recording unit for recording data by heating a recording medium;

a display unit for displaying the image signal;

a main housing comprising a first housing and a second housing, which are different from each other,

wherein said display unit and said recording unit are disposed in said first housing and said camera unit and said signal processing unit are disposed in said second housing so that heat generated by said signal processing unit when said recording unit records the data is prevented from being conveyed directly to said recording unit.
